

- What are Stationary Pages?

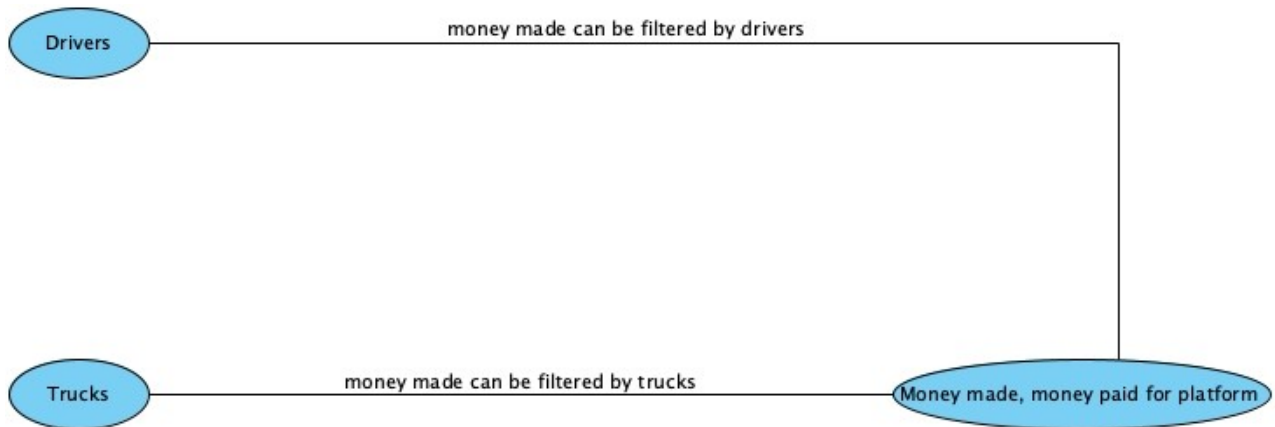

- + static pages (about, privacy, ...)
- What is insurance while requesting a new trip?
- + insurance may affect the price.
- + when creating a driver, he should state whether he has insurance or not.
- card types?
- + same like uber.
- cash scenario on paying request?
- + same like uber.
- + client may payment deposit ( maybe activated to some vip users.)
- why activating payment method ?
- + activation only on deposit.
- criteria of calculating trip price?
- + need to be discussed with client.
- ticket type should be predefined by the system owner with the ability to add other.
- + yes.
- can ticket be submitted to super admin and organization? or one of them?
- + tickets are submitted to owner.
- + tickets are categorized based on organization or clients.
- + need to be discussed with client.
- List of possible trips?, or notify the driver by the possible trips when nearby one.
- + list the scheduled trips, and notify nearby drivers for immediate trips.
- + nearby range ( factor of weight, location, type of truck)
- will the immediate trip notify the nearby drivers/organizations?, or it will be just listed and driver applies to it on demand
- reject button for trips?, it should be only ignored by driver
- + it can be hidden for the driver when he needs.
- view new registered driver for organization?, will the driver attach the organization he wishes to be part of (overhead for the organization, and may lead to false drivers want to be associated?), or should the organization send an invitation link to the driver they wish to associate with?
- + organization creates an invitation link to the driver then he registers.
- driver is only attached to one truck.
- when deleting a driver, what will happen to the trips?
- + we can delete the driver only if he doesn't any remaining transactions.
- + the trips will remain attached to the driver.
- + the driver will be suspended
- + the driver can rollback and be activated.
- + need to be discussed with client.
- when deleting an organization, what will happen to its drivers, money etc..?
- + need to be discussed with client.
- why an organization can add another organization? ( missing scenario )
- + no, it should only add drivers.

- TICKET SCENARIO -**
- User/Driver/Organization submits a new private ticket to the super admin.
  - super admin responds to the ticket.
  - User/Driver/Organization replies to the ticket.
  - Super admin can mark the ticket as solved.
  - When the user/driver/organization view the ticket replies, he should mark the comment that solved his issue.
  - if user doesn't mark the comment as solved for 30 days after viewing the admin's comment, it should be marked automatically as approved.

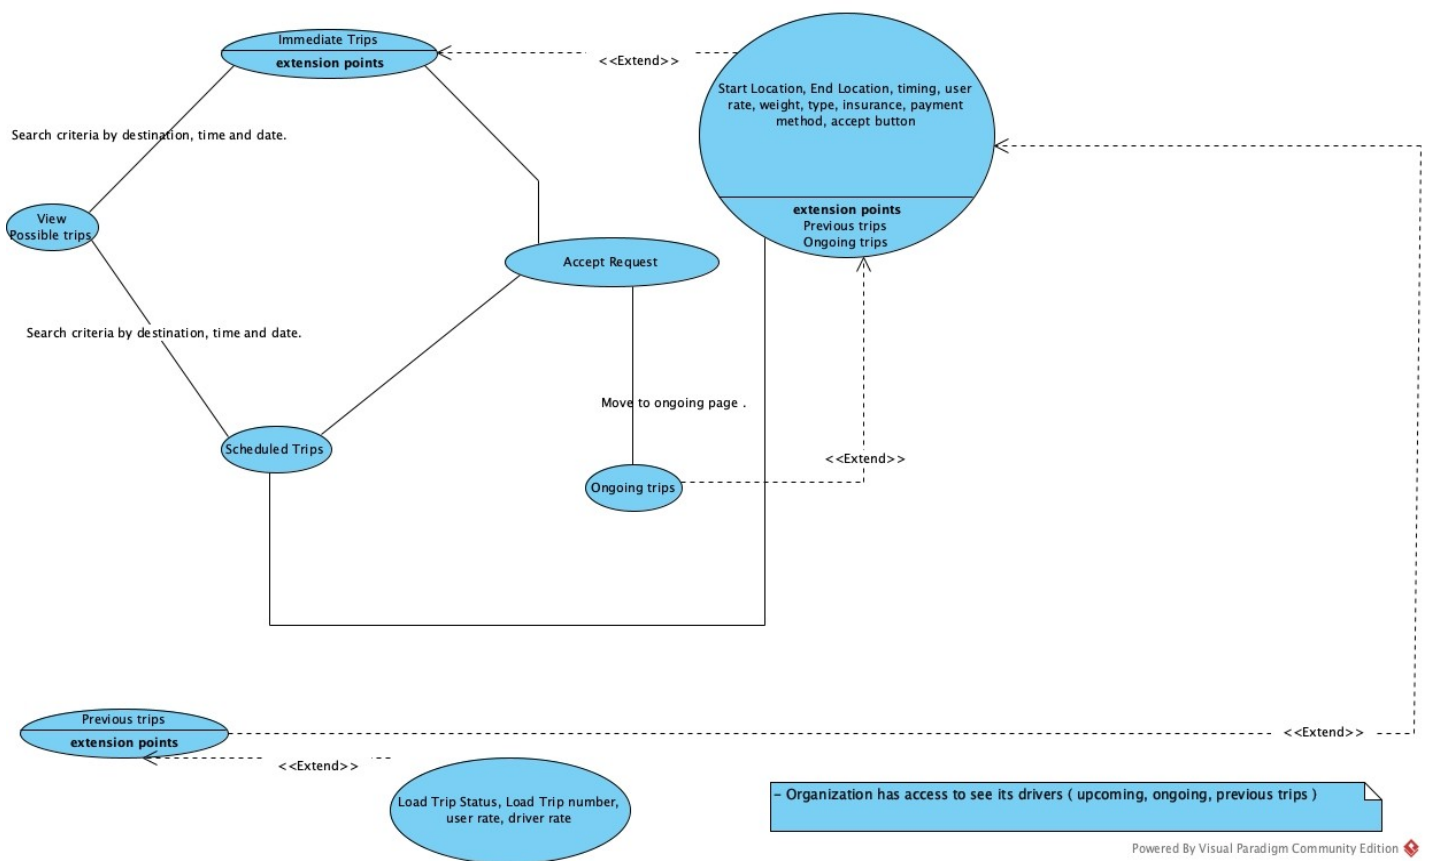

– List Trips assigned to organization by statuses, and other details of the trips.

- Employees are members of organization, ( they aren't drivers )
